

DoctorsConnect is the most modern medical software application for doctors available in the market

DoctorsConnect is a fully functional medical application where doctors can save medical records online, so they have easy access to the medical history of their patients.

A doctor and, if allowed, his or her secretary has easy access to patient information, appointment data and medical records anytime.

Medicine information at your finger tips

DoctorsConnect also contains information about common medicines, which can be included in prescriptions. Printed prescriptions as provided by DoctorsConnect have the advantage they are easily readable by patients and drug stores.

Modern technology

DoctorsConnect has been developed using the newest insights in software development. As far as we know right now it is the most modern medical application available in the market with the option of sharing data with patients, drug stores and other doctors. Of course the access is secure and privacy of all users is guaranteed.

DoctorsConnect is a SaaS (Software as a Service) web app. This means you can access your data anywhere and anytime as long as you have access to the internet. Of course it is built for use on computers with large screens, laptops, tablets as well as your smartphone.

In the near future it will be available as a native app.

Safe and secure

Main advantage of DoctorsConnect for doctors is that medical history is stored in the safest place known right now: in the cloud, the same way as Google and Facebook do. Did you ever hear of or experience Google or Facebook losing your data?

Pricing

Introductory price for the use of all functionality of DoctorsConnect is PHP 999.00 per month. Next to this we have the following offers for starters:

- Use DoctorsConnect for one month for PHP 499.00 if you want to try it out.
- Use DoctorsConnect for free for three months if you sign up for six months, so the first half year you only pay 3 * PHP 999.00 (PHP 2,997.00) instead of 6 * PHP 999.00 (PHP 5,994.00).
